

## Fractions of an amount – How to: step by step

$$\frac{4}{5} \text{ of } 30$$

1. Divide the whole number by the denominator (bottom number)

$$30 \div 5 = 6$$

2. Multiply the total by the numerator (top number)

$$6 \times 4 = 24$$

$$\frac{4}{5} \text{ of } 30 = 24$$
