Year 1

Untitled Poem by Zephyr

**Year 1, Ashton Gate Primary School**

In the future

I'm going to go on a submarine

And I'm going to bring with me a diver's suit

And I'm going to say "Hello" to all the fishes

I'll Be Me by Cece

**Year 1, Ashton Gate Primary School**

Maybe I'll be a gymnast  
motivated to win a medal.

Maybe I'll play guitar  
singing loud to heavy metal.

Maybe I'll be a teacher  
helping children learn.

Maybe I'll be a policewoman  
keeping people safe at every turn.

Maybe I'll go to India  
and travel on a tuktuk.

Maybe I'll grow old and wise  
and write my adventures in a book.

What's the future? by Rory

**Year 1, Ashton Gate Primary School**

Take care, little koala bear,

Will there be trees to share?

Take care, little koala bear.

Don't use gas, plants some trees,

Stop global warming, please.

Fires are burning in Australia,

I won't let you be a failure.

I have a big heart, I really care,

Take care, little koala bear.

Year 3

## My Future by Daniel

**Year 3, Ashton Gate Primary School**

The future

How I wonder what will happen as time flies by.

Families, laws and even time changes a lot.

I have so many questions – Will there be robots? Will there be glass bridges?

Things change piece by piece, speck after speck, as raindrops pitter patter on your roof.

And as you settle down a door starts to open.

The future, how I wonder.

My Future by Korben, Henry & Joe  
Year 3, Ashton Gate Primary School

When I grow up,  
I want to be a scuba diver  
discovering the ocean seas.

When I grow up,  
I want to be an astronaut  
discovering the cheesy moon.

When I grow up,  
I want to be a football player  
kicking the ball into the goal.

When I grow up,  
I want to be a clown  
because I am funny.

When I grow up,  
I want to be a parent  
taking care of my children.

When I grow up....

## Natures Future by Gilbert

### Year 3, Ashton Gate Primary School

#### Humans

Humans have a heart,  
They can also fart,  
Not easy to connect,  
Need a little respect.

#### Oceans

Deep in the sea,  
Learning from TV,  
Down below the coral,  
No pollution is the moral.

#### Animals

Animals have a beak,  
What they use to speak,  
Creatures have scales,  
Crocodiles, hard as nails.

#### Plants

Seeds grow into plants,  
In the wind they dance,  
Different colours of flower,  
Underground there is power.

#### Food

Food changes your mood,  
And your attitude,  
Eating too much curry,

Gets you in a hurry.

### Medicine

Medicine makes you heal,  
As fast as a wheel,  
It can be lifesaving,  
Make you better behaving.

### Science

Cars are creating smog,  
Thicker than the fog,  
What is life worth?  
More than the earth?

### Future

If we don't act fast,  
All there is, is past,  
We need clean air,  
If not BEWARE.

Year 4

My Future by D BH and Lucas  
Year 4, Ashton Gate Primary School

In my future there are robots  
Who roam the land at will  
They come in all shapes and sizes  
They all do different things

In my future there are robots  
Who can plant seeds  
They can also do your chores  
They also take pictures at great heights

In my future there are robots  
Who can build houses anywhere  
They can build trains, planes, motorbikes  
They can become your friend

## A Lego Future by Atlas

### Year 4, Ashton Gate Primary School

Soon we will live in a world made of Lego.

And it will be called Lego-world.

All the buildings will be made of Lego.

The cafes will be made of Lego.

The houses will be made of Lego.

All the people will be made of Lego.

And the Lego people will be hard,

and will have very posh houses with balconies and lovely kitchens and lovely bedrooms and lovely bathrooms.

They will have nice cars and swimming pools,

dining rooms and private jets.

Everything will be made of Lego.

But

They won't be able to have cuddles because they will be too hard.

They won't be able to enjoy their food because they don't have mouths.

They won't be able to laugh and cry because they have no hearts.

They won't be able to die because they have no brains.

But they would be able to live a life in Legoworld

But I wouldn't want to.

The New Planet by Megan

**Year 4, Ashton Gate Primary School**

The new planet is full of happiness and joy

Birds are tweeting, lions are roaring and penguins are waddling

Rivers are rippling as the wind passes by

YAY there no global warming or pollution

Stars are glistening in the shining moonlight

The planet is full of kindness and everyone is having fun

Let's celebrate! the new planet

The new planet is full of happiness and joy

My Future by Isla

Year 4, Ashton Gate Primary School

In a thousand years to come,  
Our world will have changed from what it has become.

The river will flow,  
Plants will grow,  
Animals will beam,  
And so will the gentle stream.

There will be a solution,  
For all our worries about pollution.

We will find the key,  
We will be nice to everyone, even a monkey.  
We will be kind,  
To earth, ourselves and others combined.

In a thousand years to come,  
Our world will have changed from what it has become.

Year 5

## Forests Of The Future by Zoe

**Year 5, Ashton Gate Primary School.**

A ring of flowers around the park,  
A spiral of flowers around a stone ark.  
All of them can be seen in the dark,  
Plant a flower in Spring to leave your mark.  
A scatter of flowers in the trees,  
Lots of petals upon the breeze.  
Bumble bees are collecting pollen,  
Summer is the time when flowers blossom.  
Autumn comes and leaves fall,  
Young trees with few leaves cease to grow.  
Hedgehogs hibernate for all prey is lost,  
Leaves descend before the frost.  
Winter comes and sleet rains down,  
All of it falls so the trees are snowbound.  
Leaves under snow is the home of many creatures,  
Snowdrops bloom with all of their features.

## Future Poem by Toby

**Year 5, Ashton Gate Primary School**

Jet shoes on my feet,  
Flying high above the street,  
The new way to walk the dog,  
Rising up among the fog,

Robots and people now at war,  
Since they keep breaking the law,  
We don't use money anymore,  
And there's time machines galore,

We don't eat meat only quorn,  
No land left, no cattle born,  
If only robots could disappear,  
No more hiding, no more fear.

## In The Future by Maggie

**Year 5, Ashton Gate Primary School**

In the future, cyber cities will cover all land,

Ideas and technology we have will expand.

In the future, more will be found in outer space,

Hoverboards will travel going place to place.

In the future, people will dress in sci-fi blue and dark black,

And people will learn to time travel forward and back.

In the future, we'll know more about our world,

And as humans discover, more secrets will be uncurled.

In the future, we will see amazing things,

And love all the life that planet Earth brings.

## My Future by Amelia

Year 5, Ashton Gate Primary School

Dream of a dark world with no trees,

Imagine juicy, green leaves,

Gone.

Perished.

Kaput.

Imagine the freeze,

Dream of a dark world with no trees.

Dream of a dark world with no trees,

The place could be empty,

Extinct.

Disappeared.

Removed.

People will be lost without them,

Dream of a dark world with no trees.

Dream of a dark world with no trees,

How would monkeys swing?

Vanished.

Dead.

Ended.

What about giraffes and the greens?

Dream of a dark world with no trees.

## My Future by Sabienne

Year 5, Ashton Gate Primary School

In the future...

I wonder what the future will be like.

Will aliens come for a visit?

Will space flight then exist?

I always wonder and wonder...

Will people be able to control robots with their minds?

Will flying skateboards and jetpacks exist?

Will self-driving car ever be a reality?

Will time-machine ever be created?

I will still wonder and wonder...

Will deserts be filled with snow?

Will human be able to prevent climate change?

Will the environment be still beautiful?

I will never ever know what the future will be like...

I hope that it will be a future that can be enjoyed for thousands of years to come.

## My Future by Bori

Year 5, Ashton Gate Primary School

Once long ago,  
before humans  
there was a time  
of peace in a world of beauty

Now  
the forest burns,  
the world melts  
There is no safety for hungry cubs  
No food for parents  
The world is being destroyed

By those you know very well:  
Us

But in the future  
we shall disappear  
In our own mess  
And nature shall move back  
There is no need for humans  
Nature can survive by itself

Once in the future  
After humans  
There is a time  
of peace in a world of beauty.

Step Into My Brand New World by Talia  
Year 5, Ashton Gate Primary School

Take a step, and you're here.

Don't worry there's nothing to fear

It's 2043, so come on, there's loads to see!

I'm surprised we're not all living on Mars

Don't get me wrong, I love the bars.

Competitions for Robo-dogs

Off they go, over the logs

Go on- hop, hop, hop!

OH NO! EVERYBODY STOP!

Aliens in their UFO?!

It makes me go 'Woah'

They're invading earth, quick and avoid the nerf!

Huh? They just gave me a hug,

I'm surprised I didn't get tackled to the rug.

It turns out they're really nice,

I thought they were as cold as ice.

The Mixed Future by Barnaby  
Year 5, Ashton Gate Primary School

In the future I can see flying cars,  
I see no pollution so we can spot the beautiful glistening stars.

I see amazing technology, time travel  
See a whole new eco system, fit to baffle.

I can see nature, flowers, trees,  
I see all kinds of happy animals, birds, frogs, bees.

This is the mixed future that I hope we can make,  
We can do it but we can't step on the brake.

What I Want To Be... by India  
Year 5, Ashton Gate Primary School

In my future I want to be  
the first person they see on their first day,  
helping them with maths, showing them the way.  
In my future I want to be  
the friendliest loving version of me.

In my future I want to be  
playing tennis with my family,  
strumming strings on my guitar tunefully.  
In my future I want to be  
the happiest independent version of me.

In our future we should be,  
respectful of cultures, religions and beliefs,  
kind to the land, the air and the seas.  
In our future we should be  
the most environmental for our global family.

My Olympic Future by Ivy  
Year 5, Ashton Gate Primary School

My heart thumps, thumps, thumps,  
the adrenaline races through my body,  
I take my mark as the buzzer goes,  
A swimmer dives.

The cheers of the crowd die down,  
I am plunged into a pleasant silence,  
I am alone until I come up for air,  
A swimmer breathes.

Suddenly, the yells and clapping are back,  
Water splashes around me,  
I see the five rings,  
An Olympian swims.

Year 6

In My Future by C. BH

Year 6, Ashton Gate Primary School

In my future, I can see

Me up in the stars

Jumping up and down with glee.

In my future, I can see

An amazing author writing

About animals that live in

The depths of the sea.

In my future I can see

A kind girl

Helping the homeless and the refugees.

In my future I can see

A very cute puppy yapping at me

Every day when I come home

He will be sat in the window

Chewing a bone.

In my future, I can see

Me up in the stars

Jumping up and down with glee.

My Future by Eve

**Year 6, Ashton Gate Primary School**

Our future has changed and so have we,  
The animals need our help,  
You shall soon see,  
It's not just one country, it's our whole planet.

The animals need our help,  
We need to take action,  
It's not just one country, it's our whole planet,  
There is no plan B.

We need to take action,  
You shall soon see,  
There is no plan B,  
Our future has changed and so have we.

Thank you for listening.

My Future By George

Year 6, Ashton Gate Primary School

Thinking about the future - going back to the future!

Flying at 88mph, hoverboards zooming down the street and a hologram shark nipping at my heels.

I look up, cars flying and jet packs rocketing through the air and I think .... How did I get here?

Is this the future?

Is this my future?

I dreamt of rivers instead of roads and boats instead of cars.

I dreamt of mountains of chocolate cake and no thought of broccoli.

I dreamt of a life of mindfulness, with music and calm playing from speakers at every bend in the winding river.

But cars flying and sports high in the air... what is this madness?

## Our Future by Faye

**Year 6, Ashton Gate Primary School**

Our future is a time we cannot predict,  
But we can imagine where we are in the world,  
Do I have a job in New York City,  
Or on a stage where everyone can hear me?

Am I in a big house,  
Or in a little flat with seven cats?  
Am I the best teacher in Bristol (I hope)  
Can I see my future through a telescope?

Is music running through my ears as I drive down roads?  
Our futures are like a foggy window,  
We can't quite see what's there,  
But we can guess.

Our Work Is Not Over Yet by Ella

Year 6, Ashton Gate Primary School

Our world holds wonder and beauty,  
like the stars dancing around the milky way,  
and the moon doing somersaults,  
ready to join the dusk circus,  
or the simplicity of a loved one's smile.

Yet discrimination lurks in every picturesque scene.  
For every child that finds their place  
another is lost.

Working together, our tragic fate can be altered,  
equal futures will stand before us, equal rights,  
no matter your gender, the colour of your skin or your beliefs.  
The next generation can be free of barriers.

We need to acknowledge tragedies that lie in the past,  
and remember those who fought for our today.  
The more voices that are heard  
opens up an expansive, non-stereotypical future.

Together we'll mould that future,  
Like clay on a pottery wheel,  
Moulded in humanity's hands.

I hope that we can change somebody's tomorrow,  
Because this is our future,  
and we can't let it crumble, or slip away in our hands.

Our work is not over yet.

Poem Of Our Future by Lola

Year 6, Ashton Gate Primary School

Could there be a world in the future,  
Or will our actions change?  
If we don't change now, what will happen  
Would there be a world at all?

Maybe, but with drought, melting ice, flooding  
There might be extreme weather, unpredictable weather  
Possibly strong winds, rising sea levels

Would animals and their habitats become destroyed, even extinct?  
If we thought for a second we would realise  
That we're kind of like characters in an unpredictable story and that story is ever changing

It's Possible by Josie

**Year 6, Ashton Gate Primary School**

The Future is ours

Help people to find theirs

Everyone deserves a future

For me I want to teach

Us kids are the future

The future, you decide it

Use it wisely and do what you love

Remember the past to help the future

Every future is possible

The Future We Want by Alfie  
Year 6, Ashton Gate Primary School

Slate grey lifeless land  
Coral reefs bleached and vacant  
Is this what we want?

Robots in our homes  
Taking over workplaces  
Is this what we want?

Holograms glowing  
Books replaced by microchips  
Is this what we want?

Sky-lanes stained with smoke  
Space craft spew out pollution  
Is this what we want?

Our air free of fumes  
Nature blooms all around us  
This is what we want.

The Future by Emily  
Year 6, Ashton Gate Primary School

In the future all cars will be electric  
We won't have to worry about the environment  
The Amazon rainforest won't be cut down  
Pollution will be extinct

In the future we will find many new species  
Pets may differ from now  
Some animals will be no more  
We might have guide cats not guide dogs

In the future we might live on the moon  
And maybe visit mars  
We will discover new planets  
Or even a new solar system

In the future we will have flying cars  
We might have shoes that can fly  
Maybe we will have electric planes  
Finally, robots will be just like us

What Shall I Do? by Lily

Year 6, Ashton Gate Primary School

Could I be an astronaut or a space ranger?

Maybe I will be a teacher,

Should I be a police officer or an actress?

Might I be a vet?

Perhaps I'll be a baker,

Possibly I'll work with animals,

I could be a shopkeeper,

Maybe I can be a chef

I might change the world,

you never know,

I might change lives,

And help people thrive.

I know!

I just had the best idea,

I will be kind,

And hold everyone dear, close.

## Women In The Future by Poppy

**Year 6, Ashton Gate Primary School**

I bet she gets passed the ball at playtime, because she is treated fairly now.

I am sure she gets picked for the team, because she is seen the same as them.

I am confident she can choose her hairstyle without being judged.

I bet she doesn't have to fight harder to get the same job as him because she is a girl.

I hope she gets paid the same amount of money as him.

I know she can get home safely on her own in the dark.

If this is every woman in the future, I hope she is happy.
